Foreword by Ian Painter

Here at Snowflake, we're completely committed to Open Data. But to truly achieve Open Data, you need to embrace Open Standards.

With Open Standards being at the heart of our technology, and the importance of community being key to driving Open Data, you can be sure that Snowflake ticks all the boxes.

Ian Painter

Managing Director, Snowflake Software

An Open Future for all

Our commitment to Open Data means that Snowflake will:

- Embrace Open Standards at the heart of its technology
- Support your legal obligations to Open Data (e.g. INSPIRE)
- Champion an Open Data architecture
- Maintain interoperability of data
- Provide OS OpenData in Open Standards (GML) to every customer
- Supply products that let you open up your data
- Listen to you
- Feed your requirements for Open Data into our product development
- Encourage re-use of existing infrastructure to support Open Data
- Never knowingly over sell – we're open and honest too – no bull
- Offer Open Data knowledge as part of our customer support
- Continue to innovate at the forefront of technology
- Have some fun with you along the way!

By choosing Snowflake, you're voting for a future proof, truly open based innovation. **Choose an open standards company.**
